

[3,1],[2,1],[1,0] 1 has rep of 0, 3 and 2 both has rep of 1

Convert:

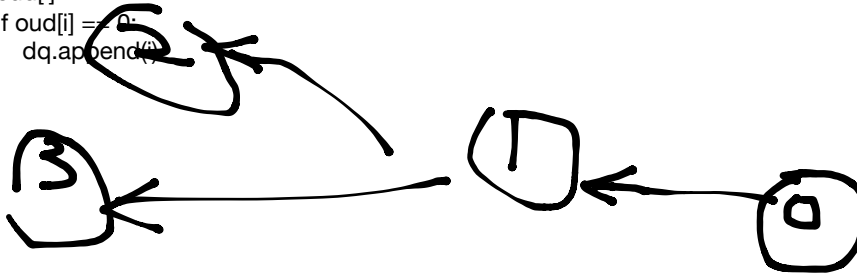

{1: [2,3], 0: [1]}, q start with [0], l = 1

for i in ind[x]:

oud[i] -= 1

if oud[i] == 0:

dq.append(i)

Arrow means after 0 solved and then go to next; 0 solved, means
